PHAM MINH NHUT

Fullstack developer

📞 0911079197   ✉ nhutphamdev@gmail.com   📍 Ho Chi Minh City

OBJECTIVE

Currently I have been working for more than 2 years with a lot of experience accumulated from my surrounding colleagues. After 2 years of working, I received many compliments from the company, especially the "Employee of year 2022" award. I will try my best for the present and the future to become a Senior Developer, devops and eventually hope to work at a technology unicorn company.

EDUCATION

Ho Chi Minh City University of Science – HCMUS   2022 - present

Software technology

WORK EXPERIENCE

ADVN Global   2022 - Present

Fullstack Developer

In the company, I take on two roles: Backend, Front-end and a little bit of devOps
As for the backend, I will take on the tasks assigned by the leader, design the API, support the mobile team, Front-end team, and learn about optimal solutions for the system

Next, for the Front-end part, I take on the task of designing the UI according to the design, specifically the figma tool, implementing code logic, processing data returned from the backend, handling errors and supporting the team members

Finally, the Devops part, in this part I am responsible for deploying the project to production, deploying servers for customers, integrating CI/CD for automatic build and automatic testing systems.

HONORS & AWARDS

Employee of the year 2022   2022

SKILLS

Ruby	I have worked through the Ruby on Rails Framework. Go through design patterns: form object, service object, decorators, query objects. Besides, I use SQL and NoSQL database types: mysql, postgreSQL, MongoDB, Redis and finally deploy third parties such as: Zalo, firebase, livekit, weather API, Facebook login. Not to mention the basic gems: Devise, sidekig, delay job.
ReactJS	I can use ReactJS through interface libraries: Bootstrap, tailwindCSS, Material UI, know how to use packages: react-router-dom, react-hook-form, formik, yup. Besides, I am proficient in using lifecycles, hooks and custom hooks. Finally, setup the server side for a pure React application to optimize SEO and apply state management: Redux, RTK, redux-saga, SWR
NextJS	Set up a complete Nextjs project, deploy utilities, and optimize the code. Learn more about rendering: ISR, SSR, SSG, CSR, optimize SEO because NextJS has stronger SEO support than React

| Devops | Setup script CI/CD, deploying servers for customers, know how to use tools: github actions, docker, gitlab ci, jenkins. |

PROJECTS

Hainong panel admin page

(2021 - Present)

Name of customer	Dam Ca Mau
Description project	Hainong panel's admin page manages categories, articles (contributed by users), user products, agricultural weather management and many other functions for farmers. Besides, in addition to the admin page, it also manages the API page provided for website and mobile.
Your team size	15 member
